NOTICE OF INFORMATIONAL MEETING FOR A
REVISED SOLID WASTE FACILITY PERMIT for the NAPA MATERIAL DIVERSION FACILITY
820 Levitin Way
American Canyon, CA 94503
Solid Waste Facility Permit(s) #28-AA-0023 & #28-AA-0030**

As a property owner, tenant, business or person who has received this notice please be advised that the Napa County LEA received and accepted for filing a Revised Solid Waste Permit Application for a transfer/processing and composting facility located at 820 Levitin Way in Napa County California. The LEA has determined the changes proposed at the facility do not meet the criteria for an RFI Amendment, or a modified permit, thus a determination for a permit revision was made, as per Title 27 of the California Code of Regulations, Section 21563(d). The LEA is certified by the California Department of Resources, Recycling, and Recovery (CalRecycle) to enforce state laws and regulations at solid waste sites within Napa County, including transfer/processing facilities and composting facilities.

Description of Proposed Revised Permit, including changes:

- Operate the already existing large volume transfer/processing facility [materials recovery facility].
- Operate the already existing large volume composting facility

The following items will be implemented:

- Food waste and co-collected food waste will be received at the facility.
- Implement food waste depackaging and anaerobic digestion activities
- Implement aerated static pile (ASP) composting process
- Storage will be changed to accommodate the biomass gasification plant
- The hours of operations will change for the compost facility as the newer compost technologies 24 hour operations to operate the blowers in the aerated static pile system and the mechanics of the anaerobic digestion system
- The operational changes and technologies will be phased in over time in a modular and distinct fashion allowing the Project to develop, while keeping the current operations in place until the newer technology is added and becomes operational
- The permitted maximum storage will increase from 60,000 cubic yards to 90,000 CYD of compost feedstock, composting material, and final product, where the food waste materials will occur under covered conditions

Where to Get Additional Information:

A copy of the proposed permit is available for public review by appointment in the LEA office located at 1195 Third St., Suite 210, Napa, CA 94559.

Options for Submitting Comments and LEA Contact Information:

If you have any questions after reviewing the above information or would like to schedule an appointment to review the proposed revised facility permit, please contact Greg Pirie at (707) 253-4144. You may also email the LEA regarding this matter at greg.pirie@countyofnapa.org. Written comments can be sent to this office via email or postal mail to the LEA. Information on the availability of appeals to the LEA of the proposed revised permit is detailed in the California Public Resource Code (PRC), Section 44307.
